### **Synopsis Smart Home Adoption** The European smart **Interactive Smart Home Ownership** home market remains **Broadband Households in Specified Western European Country** virtually untapped. Many companies have 18% been slow to act due to their sense of overhype and gadgetry. However, some early activity and accompanying success are happening. This report provides an approach to analyzing smart home/connected products needs and services. It provides deep profiles of 11 different types of EU companies and how they are addressing strategies for smart home product and services. This reports provides insight to the 0% multiple activities of U.K. Germany **France Spain** diverse players and helps each company © Parks Associates

expand its own vision.

Publish Date: 3Q 17

"EU companies must begin or accelerate their efforts to develop connected products and corrolary services of value. While the tipping point has not yet been reached and most consumers do not yet demand connectivity, the time for the tipping point is not far away, as giants such as Amazon, Google, Apple, and even IKEA view the marketplace with hunger," said Erik Overbeeke, European Partner Alliance, Parks Associates.

# 1.0 Report Summary 1.1 Purpose of Report 1.2 Research Approach/Sources 1.3 Key Questions 2.0 Market Overview 2.1 Drivers & Inhibitors 3.0 The Elements of IoT Product & Service Strategy 3.1 Diffusion of Connectivity across Product Lines 3.2 New Product Introductions, Retrofit Options or Both 3.3 Product Mix and Services 3.4 Analytics
