<p><b>Publish Date:</b> 4Q 12</p>	<p>“Businesses of all sizes have been relentless in their adoption of new technologies,” said Jim O’Neill, a research analyst at Parks Associates. “They have acquired new hardware and often allow the use of employees’ own devices, creating a complex environment of support needs. Throw the cloud and its various services into the mix, as well as the need of SMBs to curtail their expenses, and you have a perfect storm of opportunity for companies that can provide 24/7 help desks, remote software and hardware support, and the occasional site visit. Tech support, especially for very small businesses, is approaching a boom phase.”</p>
