

Synopsis	Health Services in the Smart Home
<p>The smart home industry is looking for new growth opportunities, including home-based health and wellness solutions and independent living products and services. This report examines the potential for smart home platforms to support new home-based digital health applications and services and the requirements for related business models and partnerships. It provides a five-year market forecast of the number of households benefiting from a smart home platform that supports connected health, wellness, and safety/independent living applications in the U.S.</p>	<p style="text-align: right;">© 2015 Parks Associates</p>

Publish Date: 2Q 15

“The smart home industry represents an exciting opportunity for technology vendors, and the smart home platform providers in the race stand to gain significant advantages by being flexible, adaptive, and scalable,” said Harry Wang, Director, Research, Mobility and Digital Health, Parks Associates. “Home health and wellness are seen as ‘next-frontier’ opportunities.”
