

Difficulty with Smart Garage Door Opener Setup, Among DIY Installers

© Parks Associates

Smart Product Market Assessments provide a comprehensive and deep analysis of a single smart product market. Parks Associates analysts identify key market drivers and barriers and assess market growth via topline market forecasts.

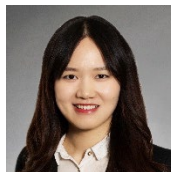

This research includes analysis and consumer data on smart garage door openers (GDOs), which are internet-connected devices that can be controlled remotely when out of and away from the home, from an app or website.

Smart GDOs include smart openers, which are full systems with connectivity built into the unit, and smart controllers, which include stand-alone Wi-Fi control accessories that communicate to traditional garage door openers using standard RF.
